Press Release – Dienst Verpackungstechnik GmbH Further P3 standard cartoners guarantee reliable replenishment

Right after burgers and spaghetti bolognese, pizza is said to be the most popular dish worldwide. So that no bottleneck can arise, two further P3 cartoners for pizza are ready for delivery. The machines have been produced in the shortest possible time and are going to a customer from the neighboring country. The customer belongs to the largest food producer of frozen food in his country. In addition to their own market, they serve the entire EU as well as Eastern Europe and overseas.

What else convinced him apart from the reliability, the full equipment and the high quality of the machines? **"Plug and Play"** is the magic word, and this is what the customer wanted. Starting production ad-hoc and saving costs.

The exhibition cartoner presented at Fachpack 2019 is already equipped with everything needed for the flexible production of pizzas or frozen baked goods. With a delivery time of only 4 months, customers can fast and easily enter into another production line at any time.

The P3 horizontal standard cartoner processes 7 different carton formats with different product formations. A maximum of 160 incoming folding boxes can be run. "More" information can be given personally on site in our factory in Hofheim (of course under Corona safety precautions), naturally by phone via our sales team and by visiting the homepage with the following link:

Get in touch – we shall be delighted.

Durability thanks to quality.

Since 1988, we have been the premium manufacturer in the field of horizontal cartoners in the food industry. In addition, we carry machines from the Top Load and End of Line ranges. We also offer customer-specific solutions and are a recognized partner of leading international producers in the food and non-food industry.

Please contact us if you are interested in the P3 video.
