

Hochheim, August 2020

POLAR Group grows together: Automation in new ways

What does this mean for us? At DIENST, it means joining forces with the aim of being the expert in automation. More concretely, we are working on being able to offer all upstream and downstream processes in the field of secondary packaging in the future.

To achieve this ambitious goal, the Hochheim am Main site will be relocated to the POLAR Group's headquarters at **Hattersheimer Strasse 16-42 in 65719 Hofheim am Taunus** at the end of the year. The merging of the locations has many advantages. From now on we can further strengthen synergy effects within the POLAR Group. After all, DIENST will not only quadruple the available space. State-of-the-art technical infrastructure and production technologies as well as considerably more personnel resources are available at the Hofheim site.

In short: The POLAR Group is growing together. Post-Press (POLAR Mohr) and Post-Process Consumer (Dienst Verpackungstechnik GmbH) will in future also strengthen their cooperation at the product development level in order to be able to offer innovative automation solutions in the printing and packaging sector.

We are also looking forward to new presentation areas. The generously designed showroom makes it possible to exhibit standard machines and to make them available to our customers for individual sample tests in the future. We would like to invite you to visit us at our new location - of course in compliance with the necessary safety precautions in Corona times.

DIENST can be reached from 01.01.2021 onwards via the convenient connection to the motorways A66, A3 and Frankfurt Airport. The train station is also in the immediate vicinity. Until the next meeting or reunion we wish you good health and are looking forward to working together with our customers, suppliers and sales partners on new projects.
