Press release - Dienst Verpackungstechnik GmbH

Amended responsibilities at Dienst as of 1st July 2016

Following the shareholders' meeting at the end of June, it was decided not to continue the cooperation with Roland Jung, Director of Production and Technology. Mr Jung has been released from his duties with effect from 1st July 2016.

Dr Markus Rall, CEO/Spokesperson and Ralf Hübner, CSO, will assume all responsibilities and be your two contacts for all matters concerning company Dienst in the future.

The objective is to introduce industrial processes in production, technology and service. With the support of the parent company, Polar-Mohn in Hofheim, Dienst is optimising existing processes for faster delivery times and more throughput with the best quality. More technical innovations are being advanced.

Significant achievements of Dienst employees over the last months and a good order intake motivate us to continue to approach the tasks ahead with a lot of confidence.

We have been a premium manufacturer in the area of horizontal cartoners in the food industry for more than 25 years. Moreover, we sell machines from the top load and end of line areas. In addition, we offer customised solutions and are a recognised partner of leading international producers in the food and non-food industries.
